YOU KILLED!!! PSY-BACKDOOR

If you would have something like Neuralink or US4877027 and Windows tells you, click here and an innocent person will die, or mouse gestures "if you draw a V with your mouse" [dx/dt | dy/dt] then a chinese person you not know will die. You maybe would not do this. But if soneone adds, "**this should technically not be possible**" and is illegal, you would need to test that to check that nobody else goes into this trap. Maybe you really killed someone. Since you don't know this person (german: kein Motiv) and Windows was sold as kids-toy not as Weapon you are **maybe** just the scapegoat. Maybe people killed Muslims on Windows so the "Colateral Murder" Video would revictimize 16Mio People for drawing this damn V on Windows (**m50** card). Unknown Genius: and those who have not really killed the victim but feel guilty too would help the real murderer to obfuscate, spam, hide all evidence that could lead to the murderer or its network.

Matrix "Architect"

...is probably just an MKULTRA Psyop, influencing a complete group of people with a generic upstream mind control system of CIA

The funny thing, in the end the big spked blob kills Neo, making all people forget about the PsyOP that was shown even as a good person. I dont beleive that Sigmund Freud = PsyOP is a good person.... but this is not proven >yet<

update: some of the hostages are institutional honeypots, for example if i found out about the fact that mental institutions are used by the cia (MindColtrol=Psychology=Psychiatry...) then we of course would try to free ioerror's mother, but possibly the cia created this situation just in case that someone like me that was already in mental institutions would find out about this dirty "game".
So "possibly" there is already a big team that waits on people that try to free jacobs mother, so best way would be to help and suport that people (eg. g2/ma8 people) that were already in the same mental institution help them and ask them for help and information(s). It would be likely that not just in the case of iorror the mental institutions go after the whole family and also use m50 card in the family

consider cards: a14, a15, m124
DANGER: if this hypothesis is correct be aware of a16 cards

So first the Agent in Matrix (Agent Smith) is somehow to young and to make the Agents feel superior such institutions have specific design, so possibly one would find out quite fast if a company is payed by the NSA/CIA just by looking at the design of the building and the design of its rooms...

not yet 100% sure about that....

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good excercise, then continue maybe with Vigenère cipher, and then p-boxes and s-boxes.
Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you dont join the crypto-anarchy movement.
Work in pairs of at least 2 people, If they want to put you in mental institution to erase your brain you have better chances to prevent that.

i dont have a lot of time *INSERT: since they target me permantly* <- psychological warfare but if you have time it's quit easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-red13 you have again the original...
