a12

Inventor: Niklas Luhmann **Year:** ~1914

A **System** is made out of **Elements [E]** or several Subsystems (= abstracted an Elemnt too). The Elements have relations (**Relations [R]**) and the relations have (German: **Konditionierende [K]**) that describes how the Relations have to be. The Law or the Bible or the Koran(?) or Karl Marx "Das Kapital" could be such a "Konditioniernde". This helps to undestand the big picture, Social-, Mechanical-, Biological-, Computer- Systemes or Soaftware.

For example if you have QuantumInserts, Tarmoil Turbine you could also filter or inject words that would make the victim look or drive insane.

Inventor: xxxx **Year:** ~????

If a NSA/CIA would have access to all peoples data, even the private diaries they would maybe install some AI that analyzes what the whitehat hacker just says, writes or thinks

Then they would try to match that on persons in his / her network that would get a cogntivie dissonace because of that sentence or concept knowledge even when i dont write names in my diary

CIA would possibly know what person or eg. Meyer-Briggs archetypes would rage because of what i just written into my privat diary. So it would be possible that the CIA/NSA would intentianally send this private diary entries to people to "motivate" them to attack me.
