

JOKER CARD

Inventor: ME!!!!
Year: ~NOW
If you are younger than 40 feel FREE TO SAY AS MANY WRONG THINGS as you Like. It's not up to you, to teach or to fix people that are older than you how they could have done things better, but do it better yourself and give this card also to the younger generations and don't make the younger generations clean up your mess like the 1950s Generation did to us: https://de.wikipedia.org/wiki/Sonderm%C3%BClleponie_K%C3%B6lliken
Use Cases
If an older Person gives you a bad feeling, if you said something wrong, it's not worth it to invest your time into his "lessons". often the teacher (Sophist opposite of a philosopher) just compensates his own self-esteem at the expense of his students....

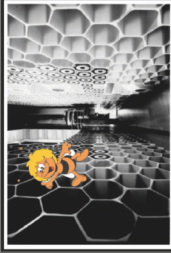

Military People at Technoparties

Inventor: Satan
Year: ~????
Possibly this unnice guy is on cocaine and thinks he installs psychological malware to the kids at that party. In fact he is just the scapegoat but does it intentionally. Remote Controlled by t1 card. if you find this video you will find out what i mean, listen to what he says.
All the things i wrote to that noted here seems to be deleted: <http://marclandolt.ch/doc/mastersOfHardcore.html>
Important thing would be that possibly all the young people from this party was owned mit hardware-, software- and psychological backdoors.
if true we need a rescue mission.

Vintage Computing

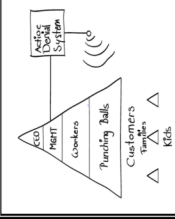

IBM Mass Storage System 3850 (80ies)

Inventor: Satan
Year: ~????
Vintage computing would maybe help to find the network of people that did so much terror to the world

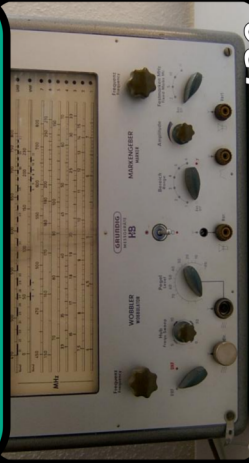

we should change that

Modern Slavery

Inventor: Satan
Year: ~????

WOBLER SWEEP GENERATOR

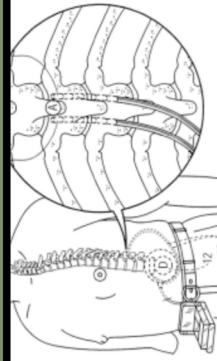

Inventor: xxxxx
Year: ~????
<https://0x8.ch/HackersCardgame7>

Generates a sweep and then the echo of this sweep is evaluated to evaluate the whole system. More modern devices are being used in eg. docsis networks.

If you project this principle on wires/antennas that that have been placed below the skin and eg. a webcam as return channel you could maybe even portscan humans or hijack their telemetry

Today we expect that digital technologies are used, but the old things maybe still up and running

Spinal Cord Implant

RISK SCORE: 10
Inventor: xxxxx
Year: ~????
<https://0x8.ch/HackersCardgame7>

Originally an implant in the spinal cord (medulla spinalis) that could force an >>> orgasm <<< (they talk explicitly about "sexual things" to make the people focus on that (m107 Card) and to obfuscate that the whole body can be remote controlled by such technology). patented 40 years later 1999 under US6169924. Today maybe enchanted with more than just that "wire" (US Army researches in this field) Output: the victim can be "used" as a robot / soldier / killer or sex slave with a 3D model of the victim in a 3D environment (like games) if all people would have such thing they could create a weapon out of such technology and unfortunately kill billions in a few seconds. Hopefully those who created this system considered that vulnerability. Mobile phone could act as UpLink to a mainframe (the US Army maybe uses the Cry-Engine with PhysX for the "Simulation")

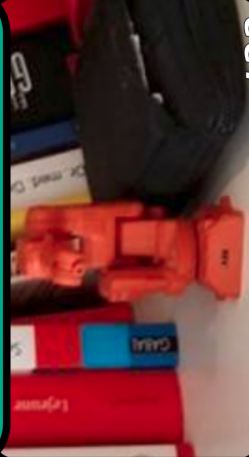

MRI/MRT

Inventor: ????
To scan a human body, hopefully siemens does not have some sort of stuxnet virus here that filters implants and wires that were illegally implemented. Algorithm would be some interpolating algorithm that removes the implant and shows normal brain.

But unsure about that so far...

Robot Teaching Mode

Inventor: xxxxx
Year: ~????
<https://0x8.ch/HackersCardgame7>

If your Hand suddenly begins with small movements on the screen. (écriture automatique, return channel mouse) they have already hacked your spinal cord implant (medulla spinalis) and they are testing if they can take over my telemetry. In my particular case they beat my hands against my own head (there are movies where autists do such things and there are special helmets for that). After they successfully attacked you they revictimize the scene (t10 card). And even if they haven't killed me, it would influence me. Maybe this is how they killed Tobias Moser, m46. And for the equal aged friends of the victim this would have the effect of psychological warfare (m46), if they used dt1 the real offender say it is all your fault, if not they say it's because you ate eg a cookie or drunk wine or other stupid reasons and b1,t1...
