

If you have a production line (that can be abused to programm stimulus-response habits), the line can have several different states, so you have to find the states and how / when (eg. eventtrigger) they change, see eg. Siemens S7 PCL UML state machine

aganist humans eg. in their bedroom (see m98, m99 The same principle is unfortunately also abused Card):

- 1. Normal: loop { you will be raped } =>
  2. Annoyed: someone says "Fu\*\* your Mother" =>
  3. Rage
  Induced with t\* cards

9

innocent victim if he / she wants to commit suicide, maybe with different ways of questioning that all Similar to that concept one can do some sort of an on the mind (eg t1 card). Question an See Rowhammer Attack the Computer variant means the same main question attack

if you do this long enough this thought would be burnt into his / her mind and maybe then cause a real suicide (attempt).

maybe in conjunction with co1, m38 cards

to quote @ioerror: "and those things seem limited either by budgets or simply by their time" so you the game with money, but you can do custom work, like pam usb that was broken when i was in mental have as a "poor" swiss guy no chance with winning institution 2017, and 2020 i could partitially fix it, Year: ~??? https://github.com/braindef/pam usb/ but not yet the one-time-pad. Inventor: xxxx

we will not

interpretation is that you have had already some matter if you did right or wrong, the older generation does what they want. Or to say it in the words of a German-speaking friend: "Recht und Gerechtigkeit cases in real curts and you found out that it does not also different menaings, e paar Schuhe' has Anarchy

ere are several (most not working) methods how they try Year: ~???? Inventor: xxxx

to delete information in the brains of WhiteHats / Whistelbowers, rape victins.... c1, c2, a16, dt1, m22, m27, m41, m44, ma5, m15, t10, co4, m42, but definitely m19. Maybe deleting the scenes of a rape situation would help the victim, maybe. Think of the drawing as a visual representation (map) of the your brain and the purple part is what they want to overwrite. Unfortunately brain is not two dimensional, so this would maybe work for a while but, and "anti-psychotics would "help" to keep the victim silent, but in the end nothing is really deleted and just reduces the intelligence. That's

opportunities in the survaillance business payed by the perpetrator. hut after a survaillance business payed by the net/2015/08/15/visuellebut after a while this "maybe"

then "suddenly" all people forgot about that thing. So maybe those things are deleted while you are dreaming / sleeping (cards t1, t10, t12, m116, The public people was informed about Carnivore and m117...) as a global default process for all people. If it would be a default process, one could maybe find out, what they are trying to delete and focus more on that things.

https://en.wikipedia.org/wiki/Carnivore\_(software)

Hardware Backdoor... / Firmware Backdoor: See:

Maybe it was intentional that IBM sold the Operating System Market to Microsoft. They could have made a lot of money. When I started to question what is going on I again ended up in a Mental Institution (again). I tried to find the things that caused me Problems in the Operating System, but maybe the Operatingsystem is just halfe of the Story.
